

MIMESIS

collection autumn/winter 2022

The Orchid Growers is the one-stop-shop for high-end Phalaenopsis. Under our Mimesis brand, we supply many varieties and special concepts all year round, available in various pot sizes. Naturally grown sustainably. With this we offer a wide and deep range, so that you can always find the Phalaenopsis under one roof in all its appearances. This makes us the sustainable partner for suppliers to the higher segment.

In our inspiration center we are constantly testing our latest ideas. As a result, we deliver concepts that are proven to matter. We unburden and think along about shelf layouts and consumers by surprising and inspiring with our brand Mimesis. A brand which is about emotion, sharing and connecting. Because that's what our orchids do.

COLLECTION

NO. 7

Most orchids have no scent, which is what makes this variety so special. At night, this plant converts CO₂ into oxygen. This process releases a wonderful natural scent, which you can smell especially in the morning. Another striking feature are the small flowers in mostly soft pastel shades.

NEW TERRA

Inspired by Mother Nature,
this new collection is born.
Terra takes you back to the
origin. The roots create their
own way through the pot.
With Terra you get a piece of
jungle into your home. Caring
is very easy thanks to the
water reservoir in the pot.
